

We at Imperial Animal Hospital strive to provide advanced, individualized, and compassionate care for your pet. This special program is specially designed for **dogs over the age of 6 months** and allows you to get everything your dog needs at a substantial savings.

Canine Comprehensive Wellness Plans for Dogs 1-6 years old.

	Value	Basic	#1	#2
Comprehensive Wellness Exam	\$80			
DAPP-L4 vaccine Combo vaccine for distemper virus, adenovirus, parvovirus, parainfluenza and Leptospirosis. Recommended yearly. Leptospirosis is a bacterial disease transmitted through urine of wildlife and causes liver/kidney disease to pets. It can also be transmitted to owners. CDC recommends all dogs be vaccinated if they go outdoors.	\$30			
1-year rabies vaccine Core vaccine and also required by law in dogs and cats. 3-year rabies vaccine for an additional \$22- preferred vaccine for pets that have history of vaccine reactions due to decreased frequency.	\$25			
Heartworm test Blood test to screen for ADULT heartworms transmitted by mosquitos. Results are given before you leave the office today.	\$35			
Intestinal parasite test* Test results within 48 hours. CDC recommends intestinal parasite screening at least once a year.	\$50			
Anal sac expression (optional) Only expressed if your pet needs them done. Signs your pet may need an expression: licking at the anus, scooting, or a foul smell from the rear end.	\$20			
Pedicure Who doesn't love a fresh nail trim?	\$25			
Blood chemistry, 14 values, and SDMA* Assesses basic liver and kidney function plus electrolytes, blood sugar, protein levels. Recommended for all pets on long term daily medications or also for early detection of disease.	\$160			
Blood chemistry, 25 values, and SDMA* Total body chemistry offers a more in-depth assessment of the liver and kidneys plus helps to identify diseases that often go undiagnosed in the early stages, such as hormone disorders, gastrointestinal disease, some types of cancer, and metabolic abnormalities.	\$210			
Complete blood cell count Screens the red and white blood cells plus platelets in the body for abnormalities such as anemia, immune system malfunction, infection, and clotting abilities.	\$134			
Total T4 Tests the level of thyroid hormone in the blood. Thyroid hormone deficiencies (dogs) can cause weight gain, hair loss, loss of energy, panting and behavior changes.	\$90			
Complete urinalysis Screens for infections, kidney function, diabetes, crystals that can lead to bladder stones, risk of bladder cancer, and protein in the urine.	\$65			
Value:		\$265	\$559	\$624
Cost w/ 1 year rabies vaccine and DAPP-L4:		\$196	\$270	\$298
